

JGI Inc.

2026 Quality Policy

《 Catchphrase 》

Solutions to Energy and Environmental Issues... Together with the Earth, Together with Society, Toward Humanity's Future.

《 Basic Philosophy 》

JGI Inc. contributes to building a prosperous and safe society for the future by providing exploration technology services grounded in extensive experience and comprehensive geoscience capabilities.

《 Basic Policy 》

In establishing and operating the quality management system, we set forth the following as our basic policies:

1. We commit to complying with all applicable legal and regulatory requirements, and to conforming to customer requirements as well as our internal standards.
2. We will continuously enhance our exploration technologies and always strive to be a leader in the industry.
3. We will provide services that meet customer needs and contribute to customer benefits, and we will proactively deliver proposals.
4. To implement this quality policy based on our quality objectives and the quality objective achievement plans, we will drive continuous improvement of operations through planned actions. We also commit to providing the necessary management resources.
5. We will continuously review and enhance the quality management system to adapt to changes in the social environment and enhance customer satisfaction.

《 FY2026 Policy 》

- In response to the global reassessment of secure and stable resource supply chains, we will strive to ensure stable earnings in the energy resource development field.
- Leveraging our comprehensive expertise in subsurface visualization and monitoring, we will promote and expand carbon-neutral businesses, with a particular focus on the CCS-CCUS field.
- We will continue to advance and expand our existing business domains in earthquake and volcanic disaster prevention and marine survey services, with the aim of establishing them as stable sources of revenue.
- By effectively utilizing our technologies, know-how, and equipment, as well as by

developing new technologies, we will pursue the creation of businesses that address societal needs and establish a resilient revenue base through business diversification.

- We will introduce globally accepted technologies that meet customer needs and enhance our overall competitiveness.
- We will systematically optimize our organization, personnel, and equipment, and establish a flexible operational framework, including external collaboration.
- Using quantitative indicators, we will accelerate and streamline operations while pursuing thorough improvements in quality.
